TO WHOM IT MAY CONCERN

I am glad to provide a reference letter for Francisco Nomdedeu, who has been under my supervision for five months for a Eurodyssea programme internship with ARDITI (Agência Regional para o Desenvolvimento da Investigação, Tecnologia e Inovação). During this period, he carried out at MARE – Madeira different practical activities, including fieldwork for cetacean data collection and laboratory activities in the area of ecotoxicology, specifically, environmental pollutants analysis in biological samples, collaborating with the Laboratory of Bioanalysis, Biomaterials, and Biotechnology (LB3) of the University of Madeira.

Fran showed excellent basic knowledge in scientific subjects, outstanding organizational skills, and a strong predisposition for interdisciplinary and multidisciplinary studies and teamwork. He is a highly motivated, focused and talented student, very keen to adapt and try new experiences.

Faithfully,

Annalisa Sambolino

PhD candidate – FCT doctoral fellow
